

RG6 Quad – Coiled and Terminated Cables

Introducing DataComm's pre-terminated RG6 Quad cables, a reliable solution for both indoor residential and commercial setups. These high-performance cables ensure seamless transmission of data signals, ideal for applications requiring dependable connectivity, such as television, antenna, satellite, and security systems. With their durable construction and superior shielding, these cables minimize signal loss and interference, guaranteeing uninterrupted data flow. Simplify your installation process and elevate your connectivity with DataComm's pre-terminated RG6 Quad cables.

Features

- 18AWG copper clad steel center conductor
- Foamed polyethylene dielectric insulation
- Four layers of aluminum shielding
- Pre-coiled and Terminated for easy installation
- No tools required
