

Mini Nail Box

"Feature Sheet"

P/N: 45-0007-WH

The DataComm Electronics Mini Nail Box is a low-profile wall pass-through box designed to neatly conceal and route low-voltage cables behind home theater, audio/video, and security equipment. It provides a clean and professional installation for HDMI, speaker, camera, and other low-voltage connections in new construction or custom AV applications, with a compact face plate that fits behind slim mounts and displays.

Key Features:

- Conceals low-voltage cables such as HDMI, speaker wire, and security camera cables behind walls and equipment.
- Low-profile design fits easily behind ultra-thin TV mounts and components.
- Compact face plate: approximately 2" x 2".
- Brush opening: approx. 0.77" x 0.87" for flexible cable routing.
- Ideal for new construction installations.
