

1-Gang Box Extender

"Feature Sheet"

P/N: 60-0001-BE

DataComm 1-Gang Box Extender is designed to bring electrical boxes flush with the finished wall surface after drywall, paneling, or tile installation. It helps maintain proper box depth, protects wiring, and ensures a clean, code-compliant finish for switches, outlets, and other wall devices in residential and commercial applications.

Key Features:

- Extends recessed 1-gang electrical boxes to be flush with finished walls
- Compatible with standard switches, outlets, and GFCIs
- Non-conductive, flame-retardant construction
- ETL listed and NEC code compliant
- Easy retrofit installation using existing device screws
- Provides added support for oversized or uneven wall openings
