

Low Voltage Brackets (New Work)

"Feature Sheet"

1-Gang Nail
P/N: 60-0011-N

1-Gang Screw
P/N: 60-0011-S

DataComm low voltage new work brackets provide a secure mounting solution for low-voltage devices in open-wall construction. Designed for use before drywall installation, these brackets attach directly to wall studs using nails or screws, creating a precise opening for AV, data, and communication wall plates. Ideal for residential and commercial new construction projects.

Key Features:

- **Designed for new construction applications prior to drywall installation**
- **Attaches securely to wall studs**
- **Enhanced D-Ring design provides secure cable and conduit tie-off point**
- **Available in nail-on or screw-on mounting options**
- **Provides accurate positioning for low-voltage wall plates**
- **Compatible with standard low-voltage AV, data, and communication devices**
- **Durable construction for long-term reliability**
- **ETL Listed to UL Standards**
