Cable
Trench System

DataComm Electronics' 75" Cable Trench System is used to create a channel behind a rack install that helps manage large bundles of bulk wire. The ability to choose between cable pass through and solid covers gives you customized control over your installation.
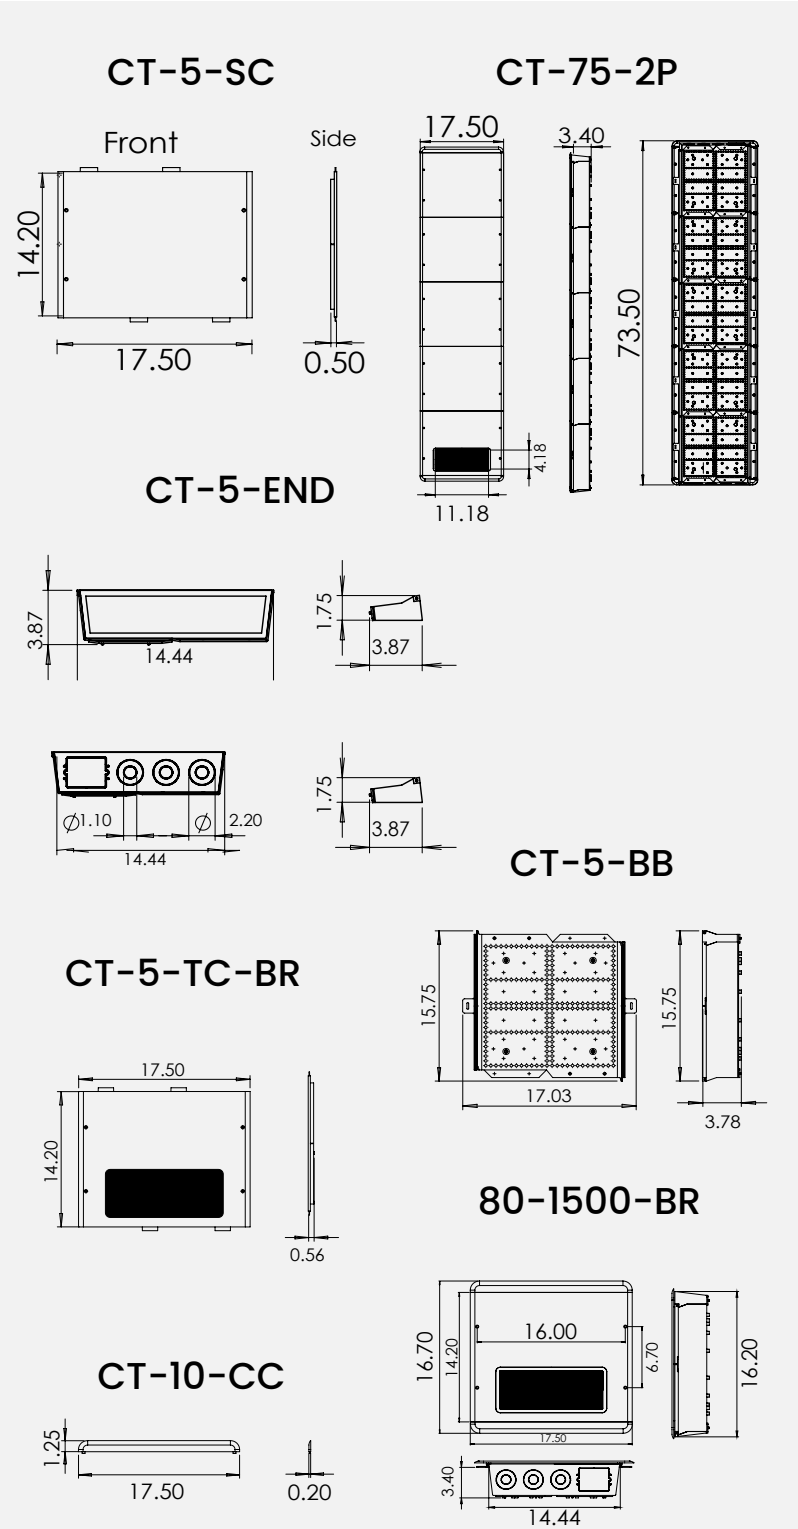

Features

- Sections are split in 15" to fit installation needs
- Clean, finished look behind the rack
- For residential or commercial applications
- Protects cables from punctures
- Fits within 16" center studs
- Easy re-access to cables
- Flush with the wall
- Modular, customizable, and paintable
- Several cover options for multiple configurations
- A la carte covers, back boxes, and caps available to customize your own Cable Trench
- Service loops and callbacks become more manageable

15" Cable
Trench Enclosure

DataComm Electronics' 15" Plastic Enclosure with Brush Cover is a great option for small to medium jobs that will not fit the full Cable Trench System.
