

Connected Media Box

"Feature Sheet"

The DataComm Connected Media Box is a recessed in-wall enclosure designed specifically for TV installations, including the Samsung FRAME TV. It provides ample space to securely house the Samsung One Connect box and other large power or streaming devices, allowing cables and components to be hidden behind the display for a clean, minimalist installation. Ideal for residential and commercial AV applications where a flush, clutter-free look is essential.

Key Features:

- Designed for TV installations, including the Samsung FRAME TV
- Accommodates the Samsung One Connect box and other large power or streaming devices
- Recessed in-wall design hides components and cables behind the display
- Ideal for residential and commercial AV applications
- Provides organized, secure housing for media and power equipment
- New Design with built in mounting system on back of enclosure
- New side-mount tabs for retrofit applications and depth adjustments
