# Remote Device Mount - RDMv2

"Feature Sheet"

P/N: 62-5440-V2

The DataComm Remote Device Mount Version 2 (62-5440-V2) provides a secure, in-wall solution for mounting various sensors and devices. Designed to secure pre-wires behind the wall, allowing for a more flush finish, and improving organization and aesthetic appeal for residential and commercial AV applications. The new threaded insert allows you to adjust device or sensor depth to any wall thickness at any time.

Key Features:

• **Secure in-wall mounting solution for remote power and control devices**
• **Designed for various HVAC, home automation & security devices & sensors**
• **Enhances organization, installs and aesthetic appeal with flush mounting options**
• **Provides easy access to cabling & devices while keeping them concealed**
• **Ideal for residential and commercial AV installations**
• **Threaded insert allows for depth adjustments at any time**
• **Updated Version 2 design for improved fit and performance**
• **Additional Inserts available for purchase (P/N: 62-5000)**
• **Best suited for devices from: JoshAI & Crestron**
• **Patent# 11,539,197**
