# 8 port - Cat6 Data Module - T568B

"Feature Sheet"

P/N: 80-0040 -B

The DataComm 8-Port Cat6 Data Module (80-0040-B) provides a centralized solution for distributing Ethernet connections within a structured wiring system. Designed for installation inside DataComm media enclosures, the module supports up to eight Category 6 network connections and features IDC punch-down terminations for secure and reliable cable management. It enables organized network distribution for residential and light commercial applications while maintaining Cat6 performance standards.

Key Features:

- Supports up to 8 Cat6 Ethernet connections
- ANSI/TIA - 568 T568B Wiring Standard
- IDC punch-down terminations for secure and reliable cable connections
- Designed for structured wiring and home networking distribution
- Compatible with DataComm media enclosures
- Provides organized cable management for clean installations
- Maintains Category 6 performance for high-speed networks
- Compact module design for efficient use of enclosure space
